**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Akiba in view of JP 4-212840.

There is disclosed in Akiba a freshness-keeping device, comprising: an absorbent 12; a film cover 16, 18 made of a material having a high impermeability to gas covering the absorbent.

JP 4-212840 discloses a film cover surrounding an absorbent, the film cover forming a skirt portion extending in a lateral direction of the absorbent and a dispersing opening 9.

It would have been obvious to one skilled in the art to modify the cover members of Akiba with that taught by JP 4-212840 and form a skirt about the absorbent, in order to direct gases from the absorbent.

***Allowable Subject Matter***

Claims 5-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
